

Guidance on Assessments for CTE Business Approved Programs

Below is a list of exams that have been approved as part of the technical assessment for CTE approved programs in business. This is NOT an exhaustive list. There may be other exams that may fit either the written or performance component of the technical assessment. For further information or clarification on exams, contact Michael LaMastra at michael.lamastra@nysed.gov.

Please note that all technical assessments must have written and performance components. All assessments listed have both, except where noted.

Precision Exams contain performance standards which MUST be used when developing an appropriate performance task. The school has some flexibility in developing what the performance task will look like, but all tasks must align to the performance standards provided.
