Wanted: Monster Masher	200	CDOS; ELA
Creating an Advertisement	201	CDOS; ELA; SS; Arts
A Country Project	202	CDOS; ELA; SS;
What Would You Have Done? 20 th -Century Presidents	204	CDOS; ELA; SS;

Possible Connecting Standards

ELA = English Language Arts Standards

LOTE = Languages Other than English Standards

MST = Mathematics, Science, and Technology Standards

H/PE/FCS = Health, Physical Education, Family and Consumer Sciences Standards

SS = Social Studies Standards

Arts = The Arts Standards

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): Earth Science

Title of Activity: Investigating the Sun and Shadows

GRADE			
9	10	11	12

Estimated Time: 5 days

OBJECTIVE(S)	COMMENCEMENT STANDARDS	
Students will collect data through measurement and access data on the Internet. Students will generate and analyze graphs. Students will generate a laboratory report.	Career Development (1)	
	1. Complete development of career plan	
	2. Apply decision-making skills in selection of a career option	
	3. Analyze skills and abilities in a career option	
	Integrated Learning (2)	
	1. Demonstrate integration and application	•
	2. Use academic knowledge and skills	•
	3. Research, interpret, analyze, and evaluate information	•
	Universal Foundation Skills (3a)	
	1. Basic Skills	
	2. Thinking Skills	
	3. Personal Qualities	
	4. Interpersonal Skills	
	5. Technology	•
	6. Managing Information	•
	7. Managing Resources	
	8. Systems

	English Language Arts	•
	Languages Other than English	
	Mathematics, Science, and Technology	•
	Health, Physical Education, and Family and Consumer Sciences	
	Social Studies	
	The Arts	
DESCRIPTION OF ACTIVITY		
<ul style="list-style-type: none"> Teacher introduces the activity to students and identifies an area around the school where students can put their tomato stakes in the ground. Divide students into small groups to gather data. Each group marks and measures shadow lengths for their tomato stake, and uses a compass to measure the sun's azimuth at that time. Each class posts their information so all students will have access to data about shadow lengths and azimuths for different times of the day. Students use their data (length of shadow and height of stake) to calculate the sun's altitude for each shadow marked. This could be done with astrolabes. Students photograph the arrangement of stakes with a digital camera for inclusion in their lab reports. Students use the Internet to access solar data from the United States Naval Observatory. They find the sun's altitude throughout the day for their location and date the lab was performed. Students import this data and copy it into a spreadsheet program, where they compare their laboratory results to those obtained from the Internet. Students go back to the Internet to obtain data for another date (i.e., December 21 or June 21), and copy that information into the spreadsheet. Students graph data from the two dates, and compare graphs to explain how the altitude of the sun changes. Students combine their knowledge of proportions with the Internet data to calculate the length of the stake's shadow at noon on that date. Students generate a laboratory report (using a word processing program), which include charts and graphs from a spreadsheet program. 		
MATERIALS/RESOURCES		
<ul style="list-style-type: none"> Computer with Internet access Spreadsheet software (e.g., Microsoft Excel) Word processing software (e.g., Microsoft Word, WordPerfect) 10 tall tomato stakes, 100 small tomato stakes 10 compasses, 10 meter sticks, 10 protractors, string 10 astrolabes (optional), calculators, tangent tables (optional) Laboratory lab sheets Digital camera 		
COMMENTS/MODIFICATIONS		
ASSESSMENT/EVALUATION		
<ul style="list-style-type: none"> Data collection is evaluated on basis of accuracy. Spreadsheets, graphs, and charts are evaluated. Completion of laboratory report is a requirement.

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): Chemistry, Physical Science

Title of Activity: Density and Specific Gravity

GRADE			
9	10	11	12

Estimated Time: 1 week

<p>OBJECTIVE(S) Students will measure the density of a liquid and relate density to concentration. Students will visit a work site that uses a hydrometer to relate the classroom to the workplace.</p>	COMMENCEMENT STANDARDS
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> Teacher introduces activity, and students divide into pairs. Students prepare six solutions of varying concentrations with antifreeze and H₂O. Students use a graduated cylinder and triple beam balance to measure density. Students use a hydrometer to measure specific gravity. Students calculate densities and specific gravity. Students construct graphs (i.e., concentration vs. density, density vs. specific gravity). Students complete a laboratory report. Students complete "Reflection and Evaluation" worksheet. Students visit a local auto repair shop to compare findings to a real-life situation. Teacher leads class in a discussion of the importance of findings. 	Career Development (1)
	1. Complete development of career plan
	2. Apply decision-making skills in selection of a career option
	3. Analyze skills and abilities in a career option
	Integrated Learning (2)
	1. Demonstrate integration and application
	2. Use academic knowledge and skills
	3. Research, interpret, analyze, and evaluate information

	Health, Physical Education, and Family and Consumer Sciences
	Social Studies
<p>ASSESSMENT/EVALUATION</p> <ul style="list-style-type: none"> Completion of the written laboratory report is required. Teacher assess answers to the following self-reflection and evaluation questions: Explain the scientific concept you investigated; Describe how this scientific concept is related to a real-world issue; Describe how working with a partner(s) helped to increase your understanding of chemistry; What did you conclude? Was the conclusion the same or different from what you expected? Describe how your observations and data support your conclusions. 	The Arts
<p>SOURCE/CREDIT Submitted by Maria Russo, Cohoes High School.</p>	

Preparation of Antifreeze Solutions

Materials and Equipment Needed:

600-ml beaker funnel
antifreeze triple beam balance
6 1-pint bottles wax pencil
droppers lab apron
distilled water goggles
paper towels

Student Directions:

Put on your lab apron and goggles.

Label the 6 1-pint bottles as 0%, 10%, 25%, 50%, 75%, and 100%.

Weigh the 600-ml beaker on the balance.

Add 25 grams more weight to the beaker weight by moving the rider.

Slowly add antifreeze until balance is achieved. You may want to use a dropper as you move closer to the balanced condition.

Add 225 grams more weight to the beaker and antifreeze weight and slowly add the distilled water until balance is achieved. Again, you may want to use a dropper.

With the aid of a funnel, pour this solution into the bottle labeled 10%.

Wash and dry the beaker.

Repeat steps 2-7, using the following masses and solution percents:

Percentage (%)	Amount of Antifreeze (g)	Amount of H ₂ O (g)
0	None	250.0 g
25	62.5 g	187.5 g
50	125.0 g	125.0 g
75	187.5 g	62.5 g
100	250.0 g	none

Additional Lab Activity:

Relationship Between Density and Concentration

Objectives:

Measure the density of a liquid.

Relate density or specific gravity to concentration.

Use a hydrometer to measure specific gravity.

Materials:

Antifreeze solutions dropper 100-ml graduated cylinder
hydrometer triple beam balance

Student Directions:

Weigh a clean, dry, 100-ml graduated cylinder.

Add 100 ml of distilled water to the graduated cylinder.

Weigh the filled graduated cylinder and record the mass in the data table for 0% antifreeze.

Return the solution to its storage container.

Clean and dry the graduated cylinder.

Repeat steps 1-4 for each antifreeze solution.

Use the hydrometer to determine the specific gravity of distilled water and each antifreeze solution. Record the measured specific gravity in the data table.

Data Table

Antifreeze Solution	Mass	Density	Measured Specific Gravity	Calculated Specific Gravity
0%				
10%				
25%				
50%				
75%				
100%				

Calculations:

Calculate the density for each solution.

Divide the density of each solution by the density of water. Record this as your calculated specific gravity.

Graph concentration versus density.

Graph density versus specific gravity.

Questions:

How does the density compare to the specific gravity for each solution?

How does density vary with concentration?

Is it possible to use density to determine concentration? Explain.

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): Chemistry, Physical Science

Title of Activity: Yahoo, the Atom! Building a Model of the Atom with the Help of the Internet

GRADE			
9	10	11	12

Estimated Time: 1 week

OBJECTIVE(S)	COMMENCEMENT STANDARDS																																			
Students will name the fundamental particles of matter and list their properties. Students will model atomic structure. Students will link historical discovery to scientific understanding.	<table border="1"> <thead> <tr> <th colspan="2" style="background-color: #ff0000; color: white;">Career Development (1)</th> </tr> </thead> <tbody> <tr> <td>1. DESCRIPTION OF ACTIVITY																																				
<ul style="list-style-type: none"> Teacher reviews with students the basic subatomic particles—their names, mass, charge, and location. Teacher models the size of an atom by comparing it to a marble in a football field or a basketball in the center of a basketball court. Teacher directs students to The Particle Adventures website at http://ParticleAdventure.org/. This site reveals that there are even more fundamental particles than the three covered in high school chemistry class. Teachers make some quick notations for the students on particular like quarks. Students work in pairs to create a real scale model of an atom by researching the actual masses and dimensions involved, and making the parts of the model proportional to the actual atom.

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): Chemistry, Consumer Science

Title of Activity: Aspirin Study

GRADE			
9	10	11	12

Estimated Time: 1 week

OBJECTIVE(S)	COMMENCEMENT STANDARDS
<p>Students will perform acid-base titration.</p> <p>Students will calculate the percentage of acetylsalicylic acid in aspirin samples.</p> <p>Students will select the best consumer choice in aspirins.</p>	<p>Career Development (1)</p> <p>1. Complete development of career plan</p> <p>2. Apply decision-making skills in selection of a career option</p> <p>3. Analyze skills and abilities in a career option</p>
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> Students are divided into teams. Teacher gives students the following task: "You are different teams of chemists working for a small, independent pharmaceutical company. You receive a letter from the 'Create an Ad Advertising Agency' asking you to compare their company's aspirin to the four leading brands. The agency needs your results in 10 days. The small, independent pharmaceutical company has received a federal grant for this project. Therefore, in addition to sending out your findings to the ad agency, you must make a presentation to the company's board of directors on _____." Students complete the aspirin consumer science laboratory activity, performing the acid-base titration and calculating the percentage of acetylsalicylic acid in five aspirin samples. Representatives from a local ad agency or promotional department of a local company are invited to the class to discuss the important components of a good product presentation. Students work with the teacher to develop a rubric for their presentations. Students prepare a computer presentation, using PowerPoint or Hyperstudio. Students make their presentations in front of the class and the representatives from the ad agencies. The presentation time and date should coincide with the students' lab period. 	<p>Integrated Learning (2)</p> <p>1. Demonstrate integration and application</p> <p>2. Use academic knowledge and skills</p> <p>3. Research, interpret, analyze, and evaluate information</p> <p>Universal Foundation Skills (3a)</p> <p>1. Basic Skills</p> <p>2. Thinking Skills</p> <p>3. Career Exploration Project

Part 1—Career Clusters:

Directions

- Read the following explanation of a career cluster.
- Review the list of 15 career clusters (14 are available to choose from; one is used as the sample.)
- Choose three career clusters from the list given.
- Prepare a chart for each of the three clusters, using the sample given.
- Complete the fourth column of the chart by contacting local Chambers of Commerce.

Career Cluster

A career cluster is a group of jobs that are similar to each other. For example, a nurse, physician, dental hygienist, and pharmacist can be grouped into the same cluster because they are all related to the health field.

Jobs can be grouped in different ways. There are 15 career clusters:

- | | |
|------------------------------|---|
| Agriculture | Business and Office |
| Communications and Media | Construction |
| Fine Arts and Humanities | Health |
| Family and Consumer Sciences | Hospitality and Recreation |
| Manufacturing | Marine Science |
| Marketing and Distribution | Natural Resources and Environmental Control |
| Personal Services | Public Service (used in example) |
| Transportation | |

PUBLIC SERVICE

Major Categories	Examples of Careers	Typical Places of Employment	Specific Local Employers
Federal Services	Mail carrier Mail clerk Armed services worker Social Security clerk Internal Revenue Service worker FBI agent CIA agent USDA meat inspector	Post office Armed forces Federal building Other federal offices	U.S. Postal Service U.S. Army, Navy, Air Force, Marines Social Security Administration
State and Local Services	Teacher Teacher's aide Firefighter Police officer Sanitation officer Coroner Librarian Social welfare service aide Corrections officer	School City government County government Library State government	_____ City School District City of _____ _____ County ___ Public Library N.Y.S. Department of Social Services State prison

Part 2—Job Profiles:

Directions

Look at the career cluster charts you have completed for Part 1.

Choose five jobs from the column labeled “Examples of Careers.”

Research these five jobs, using career information guides. Find the training and education needed for each career, expected earnings, working conditions, and job prospects for the future.

Using the Guidance Information System (GIS), research New York State’s employment potential for those jobs.

Using GIS, locate two-year colleges that provide training or courses for the jobs you have chosen.

Organize the results of your research in a table or chart format, using word processing software.

Suggested Sources

Library

Dictionary of Occupational Titles/The Occupational Information Network (<http://www.doleta.gov/programs/onet>)

Occupational Outlook Handbook

Guide for Occupational Exploration

Guidance

Encyclopedia of Careers and Vocational Guidance

Part 3—Completing a Resume:

Directions

Complete a rough draft of a resume, using an established format from GIS or a template from a word processing program.

Complete a final copy of a resume, using GIS or a template from a word processing program.

Part 4—Completing a Letter of Application:

Directions

Refer to the five jobs you researched in Part 2.

Complete a rough draft of a letter of application to a possible employer. Use an employer from the fourth column of your career cluster chart.

Complete a final copy of a letter of application, using a word processing program.

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): English Language Arts

Title of Activity: Write This Way to Canterbury!

GRADE			
9	10	11	12

Estimated Time: 1-2 weeks

<p>OBJECTIVE(S) Students will use a traditional work of literature as the basis for workplace writing. Students will complete applications. Students will create a website.</p>	COMMENCEMENT STANDARDS
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> After reading and discussing “The Prologue,” “The Nun’s Priest’s Tale,” and “The Pardoner’s Tale,” students are provided with the following situation: “You own and operate a travel agency that is offering an escorted trip to Canterbury, England. Many people have contacted you about making reservations. The number of travelers must be limited, and the participants will be selected on the basis of submitted applications.” Students determine the criteria for selecting participants for the trip and create an application form that all will use. Each student uses information from <i>The Canterbury Tales</i> to complete an application for each traveler identified in the three readings. Teacher presents the students with the following situation: “The travelers would like to share information about their trip and communicate with the ‘folks back home.’” Students work in teams to create a website for <i>The Canterbury Tales</i>. The site should have basic information about your travel agency and should include: <ul style="list-style-type: none"> An e-mail message Links to a map of the travel route A biography of Chaucer A description of each traveler Weather An itinerary Students work together to create a newsletter featuring news of the travelers for their relatives at home, using a desktop publishing program. COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): English Language Arts, Science, Social Studies

Title of Activity: Writing Whimsical Dialogues

GRADE			
9	10	11	12

Estimated Time: 2–3 days

OBJECTIVE(S)	COMMENCEMENT STANDARDS	
<p>Students will write dialogues in the subject areas. Students will demonstrate knowledge in various subject areas in relation to a specific topic.</p>	<p>Career Development (1)</p>	
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> Teacher will review with the students the various aspects of writing good dialogue. Students and teacher will create a rubric for a content-based dialogue, addressing both writing and subject-specific criteria. Students will choose one of the suggested dialogue situations: <ul style="list-style-type: none"> Write a conversation between a germ and a white blood cell. Write a dialogue in which you explain the differences between a frequency histogram and a cumulative frequency histogram. Write a dialogue between two people in a famous painting. Thomas Jefferson has returned from the grave. Write a conversation he might have with one of his descendants. Oedipus and Hamlet discuss how their relationships with their mothers have shaped their lives. You are in a friendly debate with a friend on a current issue (e.g., gun control, death penalty, animal rights). Write a pro versus con conversation for that debate. Students will brainstorm ideas to develop the dialogue. Students will research the selected topic to obtain additional information to include in the dialogue. Students write dialogues, using appropriate punctuation and writing format. 	<p>1. Complete development of career plan</p>

<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> Students read <i>In the Time of the Butterflies</i>. Students read the handout about the Helsinki Agreement and put it in their own words, using specific examples to explain the components of the agreement. Students meet in groups to share their interpretations, and they come to agreement on a group interpretation. The class discusses these interpretations to ensure that everyone has a valid understanding. Students collect three newspaper articles that identify issues put forth by the Helsinki Agreement and explain why they think that article addresses the points in the Helsinki Agreement. Students identify five times when basic human rights were unprotected in the novel <i>In the Time of the Butterflies</i>. Students work in teams to discuss their findings. Each team chooses one issue to share with the class. The class discusses each group's findings. Students complete the following writing assignment: "Take the role of one of the Mirabal sisters from <i>In the Time of the Butterflies</i>. Using that point of view, write an editorial that relates your' situation in terms of human rights being upheld or violated." 																																																	
<p>MATERIALS/RESOURCES</p> <ul style="list-style-type: none"> Copies of <i>In the Time of the Butterflies</i> Copies of student assignment Helsinki Agreement <p><i>The Helsinki Agreement states that the freedoms of speech, religion, and the press are basic human rights. The 35 nations that signed this agreement in 1975 also agreed to protect the rights of their citizens to get a fair trial, to earn a living, and to live in safety from attack.</i></p>

DESCRIPTION OF ACTIVITY		
<ul style="list-style-type: none"> Before reading a Shakespearean play (e.g., <i>Romeo and Juliet</i>, <i>MacBeth</i>), students work in groups to complete a research project on the background of the Elizabethan time period. Each group researches a different aspect of everyday life, and prepares a PowerPoint presentation of four to five slides. The presentation is to include: <ul style="list-style-type: none"> Works-cited cards in MLA format A summary slide Slide(s) using bullets A title slide Each group makes their presentation to the class and leads a discussion on the information that they learned. One of the topics to be researched is that of personal grooming and hygiene. Following a discussion of personal hygiene during the Elizabethan period, each group is given the task of creating promotional information for a perfume of that time. Students work as a team in the research and development division of an imaginary company, and they “create” the name and attributes of a new perfume/cologne. Students then complete the following tasks: <ul style="list-style-type: none"> Write a memo from the group to the president of the company, describing the perfume/cologne. Write a business letter to an advertising agency, requesting information on advertising costs and other pertinent issues. Use desktop publishing software to create a flyer to be used to advertise the product. Write a news release for the project. 		
MATERIALS/RESOURCES		
<ul style="list-style-type: none"> Computer with Internet connections Research resources PowerPoint (or other presentation software) Desktop publishing software 		
COMMENTS/MODIFICATIONS		
<ul style="list-style-type: none"> Students could create an Elizabethan magazine, writing articles and creating advertisements for the time period. 		
ASSESSMENT/EVALUATION		
<ul style="list-style-type: none"> Assessment should be based on rubrics for each piece of the task.

DESCRIPTION OF ACTIVITY		
<ul style="list-style-type: none"> Class identifies various countries in which the specified language is spoken. Class identifies a list of professions/jobs common to all identified countries. Class works in teams to research the economic differences of the countries, the specific salary levels of the identified professions/jobs, and the culture in regard to work (e.g., whether or not the mother would work outside the house). Each team member will take on the role of a different member (e.g., father, mother) of a hypothetical family, and the working members of the family are assigned a profession or choose a profession in a “blind” selection or drawing. As a family, with each family member having different needs, they will create a monetary budget. The budget will be determined on the basis of the income for the specific profession(s) and cost of living for the identified country. All items are to be written in the language being studied. Students will discuss their findings and compare/contrast the cost of living, salaries, and budgets in the same profession in the United States. 		
MATERIALS/RESOURCES		
<ul style="list-style-type: none"> Computer with Internet access Research resources Spreadsheet software, if used Guest speakers, if used 		
COMMENTS/MODIFICATIONS		
<ul style="list-style-type: none"> Budget could be prepared as a spreadsheet. Guest speakers from the countries being researched could be invited to share lifestyle and cultural information from their native countries. 		
ASSESSMENT/EVALUATION		
<ul style="list-style-type: none"> Rubrics should be used to assess presentations; clarity and accuracy should be evaluated. Teacher evaluates teamwork and the completed task.

Apply decision-making skills in selection of a career option 3. Analyze skills and abilities in a career option
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> • Students research the status of the New World in 1500. Specifically, students will identify aspects of the New World that would be attractive to Spaniards during that time period and the types of people or skills that were needed. • Students acquire information about Spain in the 1500s, identifying the profile of a “typical” candidate for moving to the New World (e.g., discussing who moved to the New World and why). • Students will find examples of handbills and other printing from the 1500s. • Class discusses the major characteristics of printing during that time period. • Class creates a rubric for a handbill, including both technical aspects of the handbill and the information included on the handbill. • Students use the provided information to create handbills meant to attract settlers. 	<p>Integrated Learning (2)</p> <ol style="list-style-type: none"> 1. Country Project

Name _____

Date _____
English 9, per _____

For this project, you will be researching one country that you will then try to “sell” to your audience. The project has several steps, so follow instructions carefully. Your group will be working together. **YOU WILL BE GRADED ON HOW WELL YOU COOPERATE WITH CLASSMATES.** Divide up the work equally, so that no one feels s/he has done too much.

Part 1

Gather artifacts for the country you are studying. An artifact is any item that reveals a truth about a culture or a country. (If each student in the group strives to bring three artifacts to class, the group will have plenty.)

Don’t stop with conventional sources (e.g., encyclopedia, online services, etc.). You may wish to use television footage, videos, advertisements, music, film, or interviews with people who have lived there.

Stay organized. Take notes for each member’s artifact. Label the notes and artifacts with any bibliographic information you will need and keep everything safe in your group envelope. Included in the notes should be the name of the artifact, a description of it, and the name of the group member who supplied it. Explain what this artifact tells you about the country you are studying. (ONE LAB DAY TO ORGANIZE)

Part 2

Create a pamphlet to entice travelers to your country.

Make up a slogan or a catch phrase. (“Come back to Jamaica” was effective.) Then look through all of your research. See how quotations, facts, and figures can be used. Decide how the pamphlet should be laid out. Make the pamphlets attractive by adding color, photographs, sketches, pictures, etc. (TWO LAB DAYS TO COMPLETE)

Part 3

Create a 30-60 second commercial in which you sell your country. This can be a radio or television advertisement. If it is for television, there should be movement; if it is for radio, it must use language that appeals to the five senses.

Have volunteer(s) from your group perform the commercial. (ONE LAB DAY)

Part 4

Write a one- to two-minute speech entitled “What We Didn’t Tell You in Our Commercial.” Here is where you discuss negative aspects of the country. (ONE LAB)

Grade for this project:

- Business letter to embassy (group grade)
- Cooperation with team (individual grade)
- Research artifacts—10 points each—unlimited (group)
- Pamphlet—quality and appearance (group)
- Commercial—Is it persuasive? (group)
- “What They Didn’t Say...” speech (group)

Since you only have two weeks to complete this project, you must budget your time well. Good luck!

COMMENCEMENT SAMPLE ACTIVITY

Content Area(s): Social Studies

Title of Activity: What Would You Have Done? 20th-Century Presidents

GRADE			
9	10	11	12

Estimated Time: 1 week

	COMMENCEMENT STANDARDS												
<p>OBJECTIVE(S) Students will investigate decisions made during various presidential administrations.</p>	<p>Career Development (1)</p> <ol style="list-style-type: none"> 1. Complete development of career plan 2. Apply decision-making skills in selection of a career option 3. Analyze skills and abilities in a career option 												
<p>DESCRIPTION OF ACTIVITY</p> <ul style="list-style-type: none"> • Students divide into teams of three and select a 20th-century President to research. Teacher makes sure that each President is selected only once. • Students use library resources and Internet to research the President to identify: <ul style="list-style-type: none"> ○ Significant decisions made during his administration ○ The impact decisions had on this and other countries ○ Political, economic, and social policies • Students representing various Presidents sit on a panel to lead class discussion about decisions made during various presidential administrations. • Other students serve as reporters on the White House Press Corps and ask probing questions. • Students select one President and write a reaction paper based on one of his decisions; paper is entitled “What Would I Have Done and Why?” 	<p>Integrated Learning (2)</p> <ol style="list-style-type: none"> 1.
