Every spring, the Grades 3-8 English Language Arts (ELA) and Mathematics Tests are administered to students across New York State. These annual ELA and math tests for students in grades 3-8 are required by the federal Every Student Succeeds Act (ESSA) of 2015. The tests are designed to measure how well students are mastering the learning standards that guide classroom instruction and help to ensure that students are on track to graduate from high school with the critical thinking, problem solving, and reasoning skills needed for success in college and the workplace. The tests also show how schools and districts are progressing with the learning standards and can be used to support professional development for teachers.

1. Is the length of the 2020 tests the same as the 2019 tests?
   • Yes, like the 2019 tests, the 2020 Grades 3-8 English Language Arts (ELA) and Mathematics Tests are two sessions each. This means that students will take each subject test over only two testing days instead of three as was the case prior to 2018.

2. When will the 2020 Grades 3-8 ELA and Math Tests be administered?
   • The ELA Tests administered by paper and pencil will be given on two consecutive school days of the school’s choosing between March 25 – March 27. The Math Tests administered by paper and pencil will be given on two school days of the school’s choosing between April 21 – April 23.
   • The ELA tests administered on computer will be given on two consecutive school days of the school’s choosing between March 24 – March 31. The Math Tests administered on computer will be given on two school days of the school’s choosing between April 20 – April 27.
   • There are make-up test dates for students absent on test days.

3. What are computer-based tests?
   • For the fourth year in a row, some districts/schools have chosen to administer the 2020 ELA and Math Tests on the computer. This is called computer-based testing (CBT).
   • Students in those schools utilizing the CBT option have access to CBT practice tests and their districts must have had prior experience participating in computer-based tests in ELA and Math.
   • The computer-based tests will have the same questions as the paper versions. However, students testing on computer will select their answers for multiple-choice questions on the computer and type their responses to open-ended questions rather than handwriting their responses to these questions in the paper test booklet.

4. Will the test continue to be untimed?
   • Like the 2016 - 2019 tests, the 2020 Grades 3-8 ELA and Math Tests will be untimed. Schools and districts have the discretion to create their own approaches to ensure that all students who are productively working are given the time they need within the confines of the regular school day to take the tests. A supervised lunch break should be arranged for students during any of the test sessions if necessary.
   • If the test is given in a large-group setting, administrators may permit students who finish to hand in their test materials (or submit the test if testing on computer) and leave the room. If so, students should exit quietly so they do not disturb any students still working.
   • While exact testing times will vary by student, estimated testing times are in the 2020 Educator Guides.

5. What types of questions are asked on the tests?
   • The ELA and Math Tests include multiple choice and open-ended questions, which assess grade-level learning standards.
   • The questions require students to apply their knowledge and, in open-ended responses, explain their reasoning. Students will read texts, write responses, and solve real-world word problems, all of which are foundational skills necessary for success in their next grade.
   • The Department will continue to release at least 75% of test questions that count toward students’ scores, including all of the open-ended questions. You can view the 2019 released questions at EngageNY.

6. How are New York State teachers involved in the test development process?
   • Hundreds of New York State educators were involved in creating and reviewing questions for the 2020 Grades 3-8 ELA and Math Tests and selecting the questions for the test forms.

7. Are there testing accommodations for students with disabilities?
   • Yes, testing accommodations are changes made in the administration of the test that provide an opportunity for students with disabilities to demonstrate mastery of skills and attainment of knowledge without being
limited or unfairly restricted due to the effects of a disability. Specific testing accommodations are recommended for individual students by the school’s Committee on Special Education (CSE) or Section 504 Committee based on the student’s unique needs.

- Testing accommodations must be documented on students’ Individualized Education Programs (IEPs) or Section 504 plans and could include: flexibility in scheduling (e.g., scheduled breaks); flexibility in the test setting (e.g., separate location); changes in test presentation (e.g., enlarged print); and changes in the method of response (e.g., use of a scribe for written responses).
- Principals are responsible for ensuring that accommodations for students with disabilities are implemented on all State and local tests consistent with the recommendations in the IEP/Section 504 plan and in accordance with Department policy.

8. Do English Language Learners/Multilingual Learners (ELLs/MLLs) who are new to the United States take the Grades 3-8 ELA Tests?
   - For the Grades 3-8 ELA Tests, schools are allowed to exempt ELLs/MLLs (including those from Puerto Rico) who, on April 1, 2019, will have been attending school in the U.S. for the first time for less than one year.
   - All other ELLs/MLLs are expected to participate in the 2020 Grades 3–8 ELA Tests.
   - There are no exemptions for students from the Grades 3-8 Math Tests.

9. Are there testing accommodations for English Language Learners/Multilingual Learners?
   - Yes. The school principal may authorize certain testing accommodations to English Language Learners/Multilingual Learners in accordance with their best judgment about the needs of these students. Principals should consult with each student’s classroom teacher in making these determinations.
   - Testing accommodations could include, for both the ELA and Math Tests, separate location; and bilingual glossaries; and for the Math Tests only, translated editions in Chinese (traditional), Haitian Creole, Korean, Russian, and Spanish; oral translation (for lower-incidence languages); and writing responses in students’ native language.

10. What will I learn from my child’s score report?
    - The results of the annual assessments will provide information about your child’s academic progress and achievement. You can use your child’s score report to guide a discussion with your child’s teacher(s) about additional supports that may be helpful in school, as well as ways to support your child’s learning at home.
    - The report will show you how your child did in comparison to other students across the State and how your child scored in specific skill and concept areas. For example, the ELA report gives scores for both reading and writing; the Math report gives scores for the key math concepts for your child’s grade level.
    - State test results may differ from the information on your child’s school report card. Report card grades are cumulative and based on many factors, including class participation, homework, attendance, quizzes, tests, and other instructional activities, all of which are important in determining a child’s academic achievement.

11. When will the 2020 Grades 3-8 ELA and Math Test results be available?
    - As in prior years, we anticipate the test results will be available in August.

12. How will the 2020 Grades 3-8 ELA and Math Test results be used?
    - The results can be used to see how schools, districts, and the State overall are progressing with the State learning standards. The 2019 scores for your school/district are available on the Department’s public data site.
    - State law and Regulations of the Commissioner prohibit school districts from making promotion or placement decisions based solely or primarily on student performance on the Grades 3-8 ELA or Math Tests. However, the statute provides that a district may consider student performance on the assessments in these decisions provided it uses multiple measures in addition to the assessments and the assessments do not constitute the major factor in such determinations. Districts should also establish procedures to ensure that parents/students are involved in and may appeal such determinations.
    - Additionally, results from the 2020 Grades 3-8 ELA and Math Tests cannot be used to evaluate teachers.
