Description of Stakeholder Engagement Activities & Results:

The New York State Education Department (NYSED) is currently developing the State Performance Plan/Annual Performance Report (SPP/APR) for the new six-year cycle for federal fiscal year (FFY) 2020-2025. NYSED obtained stakeholder input using two central approaches:

- Broad public engagement and input through online surveys between October and November 2021; and
- Virtual meetings with stakeholder groups in November 2021.

The Office of Special Education (OSE) created a Stakeholder Involvement webpage with SPP/APR resources to promote feedback and engagement. This included a message from New York State Board of Regent member, Regent Cea, about the SPP Stakeholder Meetings, an SPP Stakeholder Invitation Letter, At-a-Glance State Performance Plan Summary of Indicators 1-17, Getting to Know New York’s SPP/APR Handout, and SPP/APR FFY 2020-2025: General Overview Presentation.

For Indicator 2, the OSE created the following resources designed to engage stakeholders and build capacity in data analysis, evaluating progress in meeting New York State targets, the consideration of existing improvement activities, and the development of potential new improvement activities:

<table>

Soliciting Public Input

Virtual Stakeholder Meetings & Online Survey
Five virtual stakeholder meetings were held for Indicator 2. Meetings occurred both during the day and in the evening to accommodate different schedules. A total of 93 stakeholders participated in the meetings, including 12 parents. The meetings included an overview of the SPP/APR and viewing of the pre-recorded webinar modules. Each session sought stakeholder feedback on what stood out to them about the trend data and how to use this data to set targets and develop or strengthen improvement activities addressing dropout rates, whether the proposed SPP targets for Indicator 2 were rigorous but attainable and any other feedback participants had regarding Indicator 2.

Online Survey
Between October to November 2021, a total of 39 stakeholders completed the online survey for Indicator 2. The Indicator 2 online survey sought stakeholder feedback to evaluate the effectiveness of existing improvement activities in making progress toward dropout rate outcomes, whether participants supported potential new improvement activities, and whether the proposed SPP targets for the Indicator 2 were rigorous but attainable.

Themes of the stakeholder feedback received in the virtual meetings and online surveys on Indicator 2 included:

- The importance of identifying students with disabilities at risk of dropping out early in their school careers and intervening to support their needs.
- The need to work with schools and communities to identify why the students are dropping out to develop interventions to address those issues.
- The existing challenge that Regents diplomas may not be the best path for all students, but if they pursue CDOS or CTE they do not receive diplomas and their options after finishing high school may be more limited.
- The imperative to address student social-emotional and behavioral needs in the school setting, including the impact of COVID-19 on learning readiness today and for the years to come.
- Significant differences in dropout rate by ethnicity and disability classification require root cause evaluation.

Following the collection of stakeholder feedback from the online survey and virtual meetings, internal workgroups comprised of NYSED OSE and Information and Reporting Services reviewed stakeholder responses to identify where recommendations for target-setting and/or improvement strategies could be amended to better align with the input received from parents, school administrators, educators, advocacy organizations, community members and other interested parties. The results of the OSE’s incorporation of stakeholder feedback and evaluation of Indicator 2 progress with stakeholders are reflected in NYSED’s 2020-2025 SPP/APR targets and OSE’s development of improvement strategies as summarized further in this report.
Feedback on Improvement Strategies

Following the evaluation of Indicator 2 trend data (past targets and performance), stakeholder presentations included a description of improvement strategies with requested feedback on what activities should be considered, maintained, or strengthened to address improvements in dropout rate. The presented information and solicited feedback from a variety of stakeholders, including parents and educators, is intended to increase capacity to support activities around improving student outcomes and meeting the objectives of Indicator 2.

**Improvement Strategies Presented:**

*Existing Improvement Activities to Improve Indicator 2 Outcomes:* The OSE presentation included a description of NYSED’s Special Education Quality Assurance (SEQA) and Coordinated Intervention District (CID) reviews on secondary transition, the safety net and superintendent determination options, multiple pathways to graduation and the OSE Educational Partnership targeted professional development resources to improve dropout rates in New York State.

*Potential New Improvement Strategies to Improve Indicator 2 Outcomes:* The OSE presented three potential new improvement activities for stakeholder consideration, i.e., conducting a SEQA Review focusing on implementation of the coordinated set of transition activities/services on students’ Individualized Education Programs (IEPs); conducting educational workshops for families on topics such as diploma and credential options, transition, etc.; and conducting additional outreach to parent groups (e.g., monthly informational zoom meetings or newsletters on these and other topics).

**Stakeholder Feedback on Improvement Strategies:**

Participants of the online survey were asked to rate the effectiveness of the existing improvement activities to improve Indicator 2 outcomes. When asked to rate effectiveness on a scale of 1-5, the majority of participants rated “5” or highly effective all the existing OSE improvement activities presented. Feedback from meeting participants included the following:

- Continue supporting the schools in how to address students’ behavioral needs and
- Continue the work with schools and districts to ensure parents receive all the necessary information related to graduation requirements early on in the student’s school career, and support families in understanding the New York Alternate Assessment criteria, including the academic impact for a student assessed under that category.

Both online survey participants and virtual meeting participants were asked whether they support the OSE potential new improvement activities to reduce the dropout rate and the online survey allowed participants to rank them in order of preference. The survey results indicate conducting educational workshops for families was ranked as most important.

In addition to the improvement activities presented, stakeholders suggested the following for consideration:

- Continue to explore the 4+1 pathways to graduation and other alternatives.
- The need for more supports to students reintegrating into the community after incarceration or hospitalization due to emotional needs.
- SEQA needs to improve the review process for high school transition requirements to go beyond a “paper review”. NYSED needs to focus on how to prevent dropout and put the efforts into true prevention efforts involving the families, school personnel and community resources.
- Training on and implementation of dropout prevention and early warning/monitoring systems in schools starting in PreK. Implementation of universal screening systems to identify students at risk and intervene.
- NYSED needs to provide necessary funding and greater oversight to support this work, leading to improvement and success for SWDs.

Stakeholder responses will be used by the OSE to identify priority areas for improvement and assist in the development of the strategies that will be implemented to promote preschool inclusion and meet performance objectives for Indicator 2 in the 2020-2025 SPP/APR.
Responses on Indicator 2 Targets:

The Indicator 2 informational webinar provided stakeholders with general information about the target setting process, NYSED’s methodology for establishing the following proposed targets for Indicator 2 for stakeholder feedback:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>19.37%</td>
<td>Target &lt;=</td>
<td>19.37%</td>
<td>19.37%</td>
<td>19.37%</td>
<td>19.00%</td>
<td>18.50%</td>
<td>18.00%</td>
</tr>
</tbody>
</table>

The option that received the most responses was “just right” with fewer responses for “too low” or “too high”. The New York State 2020-2025 SPP/APR will reflect the proposed Indicator 2 targets as the final targets.
