Summary: The Coding in Minecraft credential equips individuals with the skills and knowledge necessary to harness the power of coding within the immersive world of Minecraft. This credential provides a unique opportunity for learners to merge their passion for gaming with the fundamentals of computer programming. Participants delve into Minecraft's vast virtual universe, learning to manipulate the game environment through coding languages like Python or JavaScript. By mastering these languages, learners gain the ability to automate tasks, create custom mods, and design intricate structures within the game.

Through hands-on projects and interactive tutorials, students develop proficiency in coding while exploring Minecraft's endless possibilities. This credential not only fosters technical expertise but also cultivates critical thinking, problem-solving, and creativity. Graduates of the Coding in Minecraft credential emerge with a versatile skill set that can be applied across various industries, from game development to education, empowering them to navigate the digital landscape with confidence and innovation.

Administration: The Coding in Minecraft (CIM) Certification exam is delivered through Certiport Authorized Testing Centers (CATC). Schools may become a CATC at no charge, however, they must download and install Certiport testing software to administer exams. The CIM Certification must be proctored to ensure the highest standards of testing integrity. Teachers and test administrators may become proctors at no cost.

Scoring: The CIM exam is scored by a computer scoring algorithm to produce consistent, valid and reliable results without bias. These results are available to the student and test administrator with scoring detail for each exam objective.

Technical Assistance: Certiport is dedicated to supporting our customers every step of the way. We encourage you to reach out to our expert team whenever you need technical assistance. Whether it's troubleshooting, guidance, or simply answering your questions, we're here to ensure a seamless experience. Our Technical support team can be contacted via Live Chat, Phone, or Email.

Please visit <u>https://certiport.pearsonvue.com/Support/Support-for-CATCs/Technical-support</u> for more information.

How is the selected assessment already being integrated/going to be integrated into the curriculum of the grade level/course? How does the selected assessment support the day-to-day academic goals of the educator?

Coding in Minecraft exams are generally suited to Information Technology coursework. Credential objective domains for these exams can be found at <u>https://certiport.com/Minecraft</u>. Learning and practice materials build to the exam and can be used by the instructor to scaffold learning.

How do you ensure that the assessment accurately captures if students have mastered the key concepts for the grade level/course? How is the assessment aligned with the grade level/course-relevant Learning Standards/Next Generation Assessment priorities?

The Coding in Minecraft exam leads to an industry-recognized credential, created with subject matter experts and designed by psychometricians to be fair, valid, and reliable. You can learn more about the exam creation process here: <u>https://certiport.pearsonvue.com/About/Developing-a-certification-examination</u>. Credential objective domains for the Coding in Minecraft exam can be found at <u>https://certiport.com/Minecraft</u>.

Our assessments align directly with the NYS CDOS standards, they support career exploration and provide students with the criteria needed to successfully navigate the world of work. The students will effectively demonstrate their skills and knowledge as they progress and meet desired competencies. They will have the ability to transition into the workplace or post-secondary opportunities, having the required technical and academic skillsets.

How is the selected assessment scored? How are the assessment results effectively communicated to relevant stakeholders (students, parents, teachers, administrators, etc.)? What are the assessment scores that reflect that a student is:

- 1. BELOW PROFICIENCY
- 2. APPROACHING PROFICIENCY
- 3. MEETING PROFICIENCY
- 4. DEMONSTRATING MASTERY

Below Proficiency	Below 60%
Approaching Proficiency	60 - 69%
Meeting Proficiency	70 - 89%
Demonstrating Mastery	90 - 100%

IF THE SELECTED ASSESSMENT(S) ARE NOT STANDARDIZED, PLEASE DESCRIBE HOW THE ASSESSMENT PROCESS IS COMPARABLE ACROSS GRADE LEVELS/COURSE-ALIKE CLASSROOMS?

The CIM assessment is standardized.

How is the selected assessment able to maximize the efficiency with which student performance data is gathered to allow for more classroom instructional time?

Certiport provides all the materials necessary to learn, practice, and certify. The teacher can focus on lesson plan implementation and classroom management. Our learning material and exam software can help track student progress if teacher decides to collect student assignments for grading. Pre-test results can be compared to practice (post) test results.

IF APPLICABLE, HOW WILL TECHNOLOGY BE UTILIZED DURING THE ADMINISTRATION OF THE SELECTED ASSESSMENT TO PROVIDE TIMELY AND ACTIONABLE INFORMATION?

A score report is available at the end of the assessment.

PLEASE PROVIDE ANY ADDITIONAL INFORMATION THAT MAY BE USEFUL WHEN REVIEWING YOUR APPLICATION :

<u>Please complete the following section if the selected assessment is being used for the Required Student</u> <u>Performance subcomponent (SLOs) and/or is being used with Optional Student Performance</u> <u>subcomponent as an SLO:</u>

Process for Measuring Student Growth:

Consistent with Department regulations and guidance, an SLO is an instructional planning tool developed at the start of an educator's course or building principal's school year that includes expectations for student growth. It should represent the most important learning aligned to national or state standards, as well as any other school and LEA priorities. The goals included in the SLO must be specific and measurable, based on available prior student learning data. Before setting targets for expected growth, educators will determine students' levels of preparedness at the start of the course by reviewing relevant baseline data. This baseline data may come from a variety of sources which include, but are not limited to, a student's prior academic history, pre-tests, or end of course assessments from the prior year.

SLOs are developed and approved through locally-determined processes consistent with the Commissioner's goal-setting process. SLOs should be based on the best available student data and should be ambitious and rigorous for all students. Superintendents must certify that all individual growth targets used for SLOs represent, at a minimum, one year of expected growth.

WHAT MEASURE(S) OF BASELINE DATA ARE USED IN CONJUNCTION WITH THE SELECTED ASSESSMENT TO MEASURE STUDENT GROWTH (SELECT ALL THAT APPLY):

EARLY COURSE FORMATIVE ASSESSMENT AND/OR OBSERVATIONAL DATA

DESCRIBE HOW THE PRE-ASSESSMENT INFORMS PREPAREDNESS FOR THE COURSE AND IS A GOOD	
PREDICTOR OF STUDENT GROWTH: THE PRE-ASSESSMENT PROVIDES A WAY FOR TEACHERS TO GATHER	
KEY INFORMATION, PRIOR TO THE LEARNING UNIT, ABOUT WHAT STUDENTS KNOW AND CAN DO AND	
HIGHLIGHTS STUDENT LEARNING STYLES AND INTERESTS. PRE-ASSESSMENTS PROVIDE EVIDENCE TO	
HELP TEACHERS EFFECTIVELY MATCH CLASSROOM INSTRUCTION WITH THE NEEDS OF STUDENTS. WHEN	
COMPARING A PRE-ASSESSMENT TO A POST-ASSESSMENT REPORT, RESULTS FOR EACH STUDENT	
SHOULD BE COMPARED TO DETERMINE THE NUMBER OF STUDENTS WHO ACHIEVED A HIGHER SCORE	
ON THE POST-TEST THAN ON THE PRE-TEST. THIS INFORMATION WILL BE A GREAT INDICATOR OF	
STUDENT GROWTH.	
OTHER	
PLEASE SPECIFY:	
DESCRIBE HOW THIS BASELINE DATA INFORMS PREPAREDNESS FOR THE COURSE AND IS A GOOD	
PREDICTOR OF STUDENT GROWTH:	

PLEASE EXPLAIN HOW GROWTH TARGETS FOR EACH STUDENT ARE SET FOR THE SELECTED ASSESSMENT AND METHOD OF COLLECTING STUDENT LEVEL BASELINE DATA, INCLUDING HOW TARGETS ARE DIFFERENTIATED, AS NECESSARY, BASED ON THE INFORMATION PROVIDED BY THE BASELINE DATA. IN PARTICULAR, PLEASE EXPLAIN HOW THE ASSESSMENT IS USED WITH STUDENTS WHOSE PREPAREDNESS FOR THE COURSE/GRADE LEVEL IS VARIED:

The teacher can use the pre-test to identify where the student falls on the scale with the pre-test, compared to the post-test and exam. After 150 hours or one year of study, a student should be able to pass the exam and fall within the band of 70-100%, on a spectrum of: meets proficiency, exceeds proficiency, and demonstrates mastery. An expanded spectrum may include further bars:

Below Proficiency	Below 60%
Approaching Proficiency	60 - 69%
Meeting Proficiency	70 - 89%
Demonstrating Mastery	90 - 100%

The appropriate progress for one year should take into consideration individual and environmental factors for student achievement. This standard test can be used to mark any progress, the size of which is determined based on the applicable school, local, and state regulations vis-a-vis benchmarks and individual learner needs.

STUDENT ASSESSMENTS FOR

TEACHER AND PRINCIPAL EVALUATION

APPLICANT CERTIFICATION FORM

Please read each of the items below and check the corresponding box to ensure the fulfillment of the technical criteria.

PLEASE SUBMIT ONE "FORM G" FOR EACH APPLICANT.

The Applicant makes the following assurances:

Assurance	Check each
	box:
The assessment is rigorous, meaning that it is aligned to the New York State learning standards or,	
in instances where there are no such learning standards that apply to a subject/grade level,	
alignment to research-based learning standards.	X
To the extent practicable, the assessment must be valid and reliable as defined by the Standards	
of Educational and Psychological Testing.	X
If used with a Student Learning Objective, the assessment can be used to measure one year's	
expected growth for individual students.	X
For K-2 assessments, the assessment is not a "Traditional Standardized Assessment" as defined in	
Section 1.3 of this RFQ.	X
For assessments previously used under Education Law §3012-c, Education Law §3012-d under RFQ	
#15-001, or for purposes other than educator evaluation, the assessment results in differentiated	
student-level performance. If the assessment has not produced differentiated results in prior	
school years, the applicant assures that the lack of differentiation is justified by equivalently consistent student results based on other measures of student achievement.	\mathbf{X}
For assessments not previously used in teacher/principal evaluation, the applicant has a plan for	
collecting evidence of differentiated student results such that the evidence will be available by the	
end of each school year.	X
At the end of each school year, the applicant will collect evidence demonstrating that the	
assessment has produced differentiated student-level results and will provide such evidence to the	
Department upon request. ²	X

² Please note, pursuant to <u>Section 2.2</u> of this RFQ, an assessment may be removed from the approved list if such assessment does not comply with one or more of the criteria for approval set forth in this RFQ
