**RE: Carrying-Over 2019-20 School Year State Funding into 2020-21**

### Background

The New York State Education Department (NYSED) recognizes that the novel coronavirus (COVID-19) has uniquely impacted operations for school districts. This memorandum provides guidance on the potential for unspent 2019-20 school year State funding to be carried-over into the 2020-21 school year.

### Carry-Over Parameters

The extent to which State funds may be carried-over from one school year to the next is determined by the source of the funds from which the program is funded. Some State funds come from sources that are school year specific and/or have appropriation language that only provides one year for the funds to be spent. Other fund sources provide more flexibility that may allow the opportunity for carry-over, subject to the availability of State funding.

The attached chart provides a list of State funded programs appropriated in 2019-20 and identifies those programs that are school year specific and those programs that are not school year specific. Unspent 2019-20 State funds for programs that are school year specific are not permitted to be carried-over into 2020-21. Unspent 2019-20 State funds for programs that are not school year specific have the potential to be carried-over into 2020-21, subject to the availability of funding.

Thank you for all of the support you are providing to your students as we work together to respond to the unique challenges brought about by this unprecedented situation. If you have questions or need additional information, please contact Andrew Klippel ([Andrew.Klippel@nysed.gov](mailto:Andrew.Klippel@nysed.gov)).
