File No. 6b-01

DECISION

Case 1

ICR 56

The Petitioner, pursuant to Section 30 of the Labor Law, having filed Petition No. 6b-01 on May 3, 2001 with the Commissioner of Labor for a variance from the provisions of Industrial Code Rule 14 as hereinafter cited, on the grounds that there are practical difficulties or unnecessary hardship in carrying out the provisions of said Rules; and the Commissioner of Labor having reviewed the investigative report of May 24, 2001; and

Upon considering the merits of the alleged practical difficulties or unnecessary hardship and upon the record herein, the Commissioner of Labor finds that:

Case No. 1

ICR 14-6.8

VARIANCE GRANTED. The Petitioner proposes to have outside boiler room doors swing to the exterior and interior boiler room doors swing into the boiler room. This proposal was a result of a boiler room door blowing open into a student occupied corridor. The variance is granted based on the following:

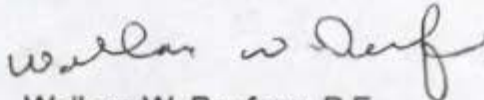

THE ASSUMPTIONS

1. The risk of injury to building occupants in the event of a boiler system failure overrides the rule of thumb that doors swing in the direction of egress.

Copies of this DECISION shall be retained on site for future inspections.
