

# 21 APR AUTOMATION

## ISA Details

Item	Description
Connection Location	Give the location address of the functional equipment for the State system (e.g., server room, communications center) and user access points (e.g., building, office number, home.) Example: State Data XYZ systems and access points are located at 550 C Street Washington DC 20020
Point of Demarcation	List the logical components at which control over and protection of the data becomes responsibility of the other system.) Example: State Data XYZ firewall represents the State Data XYZ point of demarcation.
Topology Drawing	Create a logical drawing showing systems and boundaries, which emphasizes where data of one system is placed in the other system or transported between access points.
Name of Your State's System	Identify the name of your State's data system which will be named in the ISA and transmit 21st CCLC data to 21APR.
Signatory - Designated Approving Authority	Identify the name of the official who is the closest to the system in terms of oversight; in the majority of cases, this individual will be the State 21st CCLC Director.
Signatory - Technical Lead Manager	Identify the name of person who administers state data collection system(s), understands the requirements for any variable built into 21APR as it might relate to your State's system(s), and who assists the SEA SU throughout the entire process of implementing Automation.
