Filtering

Entities displayed in the dropdowns are determined by a user's entitlements in SEDDAS. At a minimum, a user must select a "School Year" and "District" to generate the report.

The **District** filter displays the district where the student's last regular enrollment (see list above) was in the selected school year. If there are no students in the district participating in the NYSTP assessments for the selected school year, the district will not display in the dropdown.

The **Location** filter displays all locations that administered the NYSTP assessments within the selected "School Year" and "District." There is also an option to generate a "District Rollup." The "District Rollup" will not include "Location Name" or "Location BEDS Code." By default, the "Location" is set to display "All. "

The **Report Subject Area** filter displays all grade levels for students that participated in the NYSTP, NYSAA, or NYSESLAT assessments based on their most recent regular enrollment record, within the selected

"School Year," "District," and "Location." The default for the "Report Subject Area" filter is "All Subject Areas."

The **Assessment** filter allows the user to view the report for "All Students" for a specific NYSTP, NYSAA, or NYSELSAT assessment level within the selected "School Year," "District," "Location," and "Grade." There is also an option to generate a "Tests Rollup." The "Tests Rollup" will not include "Assessment Name." If "All Tests" is selected for "Assessment," then the "Assessment" column will display. The default for "Assessment" is "Tests Rollup."

The **Subgroup** filter allows a user to view the report for "All Students" or a selected subgroup. There is also an "All Subgroups" option that displays all subgroups for students that participated in the NYSTP, NYSAA, or NYSESLAT assessments within the selected "School Year," "District," "Location," "Report Subject Area," and "Assessment Level." The Accountability subgroups are marked by an asterisk. For districts, "Subgroup" defaults to "All Students" and for Charter Schools and Religious and Independent Schools (nonpublics), "Subgroup" defaults to display all subgroups.

Display Ancillary Data allows a user to include additional demographic data in the detail report. See Additional Variables shown in the detail when the Display Ancillary filer is set to "Yes."
