With your team, based upon the information shared, please discuss the following, as related to your school. Presenters will provide time during the session for team conversation.

Discussion Protocol #1: How would you describe the profile of an at-risk/potential drop-out student and what measures do you have in place to support them?

Discussion Protocol #2: Are there any strategies that you learned in this presentation that you will implement? If so, what will you implement? Who will help you do it? What questions does implementation raise?
