SSIP Overview

Page Last Modified: 11/24/2025

Institution ID

800000052269

1. **Please enter the name of the person to contact regarding this submission.**

Frances May

- 1B. **Please enter their phone number for follow up questions.**

716-992-3606

- 1C. **Please enter their e-mail address for follow up contact.**

fmay@edencsd.org

2. **Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of an approved Smart Schools Investment Plan.**

Supplemental submission

3. All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department. **By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.**

☒ District Educational Technology Plan Submitted to SED and Approved

4. **Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.**

By checking the boxes below, you are certifying that you have engaged with those required stakeholders.

- ☒ Parents
☒ Teachers
☒ Students
☒ Community members

5. **Did your district contain nonpublic schools in 2014-15?**

- ☐ Yes
☐ Yes, but they have all since closed, moved out of district or are declining use of SSBA funds
☒ No

6. **Certify that the following required steps have taken place by checking the boxes below:**

- ☒ The district developed and the school board approved a preliminary Smart Schools Investment Plan.
☒ The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
☒ The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

SSIP Overview

Page Last Modified: 11/24/2025

as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.

- ☒ The district prepared a final plan for school board approval and such plan has been approved by the school board.
- ☒ The final proposed plan that has been submitted has been posted on the district's website.

6B. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

6C. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

7. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

1,561

8. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

9. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code

10. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

11. Your district's Smart Schools Bond Act Allocation is:

12. Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment				

13. This table compares each category budget total, as entered in that category's page, to the total expenditures listed in the category's expenditure table. Any discrepancies between the two must be resolved before submission.

	Sub-Allocations	Expenditure Totals	Difference

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

School Connectivity

Page Last Modified: 11/24/2025

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:

- sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
- is a planned use of a portion of Smart Schools Bond Act funds, or
- is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1B. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	0.00	(No Response)	(No Response)	(No Response)

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

(No Response)

4. Describe the linkage between the district's District Instructional Technology Plan and how the proposed projects will improve teaching and learning. (There should be a link between your response to this question and your responses to Question 1 in Section IV - NYSED Initiatives Alignment: "Explain how the district use of instructional technology will serve as a part of a comprehensive and sustained effort to support rigorous academic standards attainment and performance improvement for students.")

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

School Connectivity

Page Last Modified: 11/24/2025

Your answer should also align with your answers to the questions in Section II - Strategic Technology Planning and the associated Action Steps in Section III - Action Plan.)

(No Response)

5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

6. Smart Schools plans with any expenditures in the School Connectivity category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

(No Response)

8. Include the name and license number of the architect or engineer of record.

Name	License Number
(No Response)	(No Response)

9. Public Expenditures – Loanable (Counts toward the nonpublic loan calculation)

Community Connectivity (Broadband and Wireless)

Page Last Modified: 11/24/2025

1. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in the community.

2. Please describe how the proposed project(s) will promote student achievement and increase student and/or staff access to the Internet in a manner that enhances student learning and/or instruction outside of the school day and/or school building.

(No Response)

3. Community connectivity projects must comply with all the necessary local building codes and regulations (building and related permits are not required prior to plan submission).

4. Please describe the physical location of the proposed investment.

5. Please provide the initial list of partners participating in the Community Connectivity Broadband Project, along with their Federal Tax Identification (Employer Identification) number.

Project Partners	Federal ID #

6. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
		0	0.00	0

7. If you are submitting an allocation for Community Connectivity, complete this table.

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation

Classroom Learning Technology

Page Last Modified: 11/24/2025

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

In August 2023, the district completed a comprehensive wireless network upgrade, replacing all legacy equipment with two Aruba 9240 wireless controllers and Aruba AP 635 access points across all facilities. This enhancement delivers high-speed Wi-Fi 6E connectivity, providing reliable, high-capacity coverage to support both instructional and administrative operations. With this modern infrastructure, the district currently meets—and is well positioned to exceed—the state's connectivity speed standards for years to come.

- 1B. **If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.**

☒ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	1,270	127.00	1000	1000	Currently Met

3. **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**

Please describe how you have quantified this demand and how you plan to meet this demand.

The district continuously assesses wireless network demand by analyzing the total number of active devices, including student Chromebooks, staff laptops, tablets, and other instructional technologies. Network utilization data from the Aruba Central management platform is actively monitored to track bandwidth consumption and client density across all access points.

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

Classroom Learning Technology

Page Last Modified: 11/24/2025

The 2023 upgrade to Aruba 9240 controllers and Aruba AP 635 Wi-Fi 6E access points was strategically designed to support high-density environments and anticipate future growth in device usage. Each access point delivers multi-gigabit throughput and dynamic bandwidth allocation, ensuring consistent, high-performance connectivity even during peak usage periods such as state testing or building-wide instructional activities. The district will continue to analyze usage trends and make capacity adjustments or deploy additional access points as needed to sustain optimal network performance and meet evolving user needs.

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

☒ By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

5. **Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

The district plans to purchase a total of 1,065 Chromebooks—325 for grades 3–5, 320 for grades 6–8, and 420 for grades 9–12—along with 50 laptops for middle and high school teachers. The district has tested and verified that these devices will operate efficiently within both the current and planned upgrades to the network and wireless infrastructure. Each classroom will be equipped with charging stations to ensure students can easily recharge their devices. No impact to HVAC or electrical systems is anticipated.

6. **Describe how the proposed technology purchases will:**
- > enhance differentiated instruction;
 - > expand student learning inside and outside the classroom;
 - > benefit students with disabilities and English language learners; and
 - > contribute to the reduction of other learning gaps that have been identified within the district.

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")

In addition, describe how the district ensures equitable access to instruction, materials and assessments and participation in the general curriculum for both SWD and English Language Learners/Multilingual Learners (ELL/MLL) students.

Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

Classroom Learning Technology

Page Last Modified: 11/24/2025

expedited basis, the district should explain how this plan will facilitate remote and hybrid learning, in lieu of responding to the question above.

The proposed technology investments will enhance differentiated instruction, expand student learning opportunities both inside and outside the classroom, and help address identified learning gaps across the district.

The vision of Eden Central School District is to foster a collaborative learning community that values each student's individuality, empowering them to become productive citizens in an ever-changing and diverse world. The district's approved Technology Plan outlines four goals to support this vision. Goal One is currently being addressed through district funding and ongoing professional development, while Goals Two, Three, and Four will be strengthened through this SSIB submission, particularly in the area of professional development as described in Question 8.

Teachers and students will leverage modern technology to enhance traditional instructional practices and advance the district's shift toward inquiry- and project-based learning. These learning environments require current tools that allow students to personalize their learning and demonstrate understanding through multiple forms of media.

The proposed devices will also expand collaboration among students at the classroom, school, district, state, national, and global levels. Integrated with the district's learning management system and the Google Workspace for Education suite—including Gmail and related applications—students and teachers can seamlessly share assignments and assessments electronically.

Google Workspace is a widely adopted, web-based platform accessible from any internet-connected device. It supports differentiated instruction by allowing students to engage with materials at their own pace and ability level.

1:1 student devices, Chromebooks and iPads (not included in this SSBA submission) also serve as critical assistive technology for students with disabilities and English Language Learners. Applications such as Google Translate, Proloquo, and TalkIt provide equitable access to curriculum, instructional materials, and assessments. Collaboration between the technology and special education departments ensures that students' Individualized Education Program (IEP) requirements are met effectively.

By providing these devices, the district increases opportunities for practice, remediation, and reinforcement of instruction. Because the tools are internet-based, they naturally support the integration of subjects and real-world learning experiences, preparing students for success in a digitally connected and rapidly evolving world.

- 7. Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

The district maintains an active website, a mass communication system for phone, email, and text messaging, and an anonymous web-based bullying reporting platform. In addition, all teachers have direct access to student and parent email communication through the district's student information system. Parental engagement in students' academic activities enhances communication and collaboration between home and school.

The proposed device purchases will further strengthen the district's technology environment, supporting more effective communication among parents, students, staff, and the broader school community. Through the district's learning management system, the "Parent Portal," families can monitor their child's academic progress in each content area.

The collaborative tools within Google Workspace for Education expand students' ability to work with peers across their class, school, district, state, nation, and even internationally. These platforms enable virtual collaboration beyond the limits of the traditional classroom, allowing students to engage in group projects and discussions anytime, anywhere. Built-in device cameras also support face-to-face video collaboration, connecting students with others around the world and enhancing global learning opportunities.

- 8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff**

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)Classroom Learning Technology

Page Last Modified: 11/24/2025

can employ the technology purchased to enhance instruction successfully.

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an expedited basis, the district should provide a statement confirming that the district has provided or will provide professional development on these devices to its staff, in lieu of responding to the question above.

Professional development at Eden Central School District may include, but is not limited to, the following examples. Please note that only Technology Plan Goals Two, Three, and Four are being addressed in this SSIB submission. Goal One's professional development strategies can be found online in the full Technology Plan.

Technology Plan Goal Two: Integrated Learning System

The district has standardized on Google Workspace for Education (formerly GAFE) and Google Classroom after piloting several systems and offering introductory workshops. Teachers have opportunities to participate in workshops provided by BOCES Model Schools, WNYRIC, or other professional development providers. In addition, teachers may request individualized training with one of the district's Technology Integrators. Establishing and integrating an online curriculum through Google Workspace and Google Classroom is an ongoing process, supported by continued staff development opportunities such as Model Schools workshops, Teacher Center workshops, regional workshops, or other professional learning experiences at colleges or conferences.

Technology Plan Goal Three: Implementation of ISTE Technology Standards by Teachers

All teachers are required to self-evaluate their teaching relative to district technology goals. The evaluation reviews progress toward meeting ISTE standards and includes plans for incorporating technology and professional development into the upcoming year. The Director of Curriculum & Staff Development reviews these requests and incorporates them into superintendent professional development days, after-school sessions, or summer workshops. If needed, teachers may also participate in Teacher Center workshops, regional WNYRIC workshops, or other professional development opportunities to meet specific technology curriculum requirements.

Technology Plan Goal Four: Personalized Learning Plan

Developing and implementing a personalized, inquiry-based learning plan is a top district priority. The district participates in a BOCES pilot with Education Elements™ to support staff development and the implementation of a personalized learning plan for administrators and teachers. While personalized learning can occur without technology, the district's 1:1 device initiative enhances its effectiveness. Pilot teachers in early grades receive a full class set of devices, along with a printer, charging cart, and a yearlong Model Schools training program that includes both pull-out and push-in sessions. Additional classroom teachers receive a smaller set of devices with grade-level specific Model Schools training. As new devices are implemented in lower grades, existing shared technology resources are reallocated to upper-grade classrooms, accompanied by continued Model Schools professional development.

The district encourages all teachers and administrators to pursue professional development aligned with their curriculum needs. Options may include weekend courses, research projects, mini-grants, Teacher Center workshops, WNYRIC regional workshops, or other professional development opportunities at colleges or conferences.

9. **Districts must contact one of the SUNY/CUNY teacher preparation programs listed on the document on the left side of the page that supplies the largest number of the district's new teachers to request advice on innovative uses**

9D. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

Dr. Wendy Patterson

- 10. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.**

☒ By checking this box, you certify that the district has a sustainability plan as described above.

- 11. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.**

☒ By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

- 12. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

Pre-Kindergarten Classrooms

Page Last Modified: 11/24/2025

1. **Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.**

(No Response)

2. Describe the district's plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that new pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. **Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.**

(No Response)

4. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.**

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

1. Describe the district's plan to construct, enhance or modernize education facilities to provide high-quality instructional space by replacing transportable classrooms.

(No Response)

2. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.**

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number

(No Response)

3. **For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.**

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. **Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
		0	0.00	0

5. **If you have made an allocation for Replace Transportable Classrooms, complete this table.**

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	(No Response)
Enhance/Modernize Existing Instructional Space	(No Response)
Other Costs	(No Response)
Totals:	0.00

Smart Schools Investment Plan - Revised - Smart Schools Investment Plan - Smart Schools (3)

High-Tech Security Features

Page Last Modified: 11/24/2025

1. Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.

(No Response)

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Smart Schools plans with any expenditures in the High-Tech Security category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number

(No Response)

3. Was your project deemed eligible for streamlined Review?

☐ Yes☐ No

4. Include the name and license number of the architect or engineer of record.
