800000038420

1. **Please enter the name of the person to contact regarding this submission.**

Christopher Ruberti

- 1B. **Please enter their phone number for follow up questions.**

518-356-8200

- 1C. **Please enter their e-mail address for follow up contact.**

rubertich@mohonasen.org

2. **Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of an approved Smart Schools Investment Plan.**

Supplemental submission

3. All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.
By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.

☒ District Educational Technology Plan Submitted to SED and Approved

4. **Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.**

By checking the boxes below, you are certifying that you have engaged with those required stakeholders.

- ☒
- Parents
-
- ☒
- Teachers
-
- ☒
- Students
-
- ☒
- Community members

5. **Did your district contain nonpublic schools in 2014-15?**

- ☐
- Yes
-
- ☐
- Yes, but they have all since closed, moved out of district or are declining use of SSBA funds
-
- ☒
- No

6. **Certify that the following required steps have taken place by checking the boxes below:**

- ☒
- The district developed and the school board approved a preliminary Smart Schools Investment Plan.
-
- ☒
- The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
-
- ☒
- The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

SSIP Overview

Page Last Modified: 08/04/2025

as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.

- ☒ The district prepared a final plan for school board approval and such plan has been approved by the school board.
- ☒ The final proposed plan that has been submitted has been posted on the district's website.

6B. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

6C. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

7. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

3,000

8. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

9. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code

10. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

11. Your district's Smart Schools Bond Act Allocation is:

12. Final 2014-15 BEDS Enrollment to calculate Nonpublic Sharing Requirement

	Public Enrollment	Nonpublic Enrollment	Total Enrollment	Nonpublic Percentage
Enrollment				

13. This table compares each category budget total, as entered in that category's page, to the total expenditures listed in the category's expenditure table. Any discrepancies between the two must be resolved before submission.

	Sub-Allocations	Expenditure Totals	Difference
School Connectivity

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

School Connectivity

Page Last Modified: 07/22/2025

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:
 - sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
 - is a planned use of a portion of Smart Schools Bond Act funds, or
 - is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

- 1B. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	0.00	(No Response)	(No Response)	(No Response)

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.
4. Describe the linkage between the district's District Instructional Technology Plan and how the proposed projects will improve teaching and learning. (There should be a link between your response to this question and your responses to Question 1 in Section IV - NYSED Initiatives Alignment: "Explain how the district use of instructional technology will serve as a part of a comprehensive and sustained effort to support rigorous academic standards attainment and performance improvement for students.")

Your answer should also align with your answers to the questions in Section II - Strategic Technology Planning

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

School Connectivity

Page Last Modified: 07/22/2025

and the associated Action Steps in Section III - Action Plan.)

5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

6. Smart Schools plans with any expenditures in the School Connectivity category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number

7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

(No Response)

8. Include the name and license number of the architect or engineer of record.

Name	License Number

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

Classroom Learning Technology

Page Last Modified: 07/28/2025

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission's 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

To ensure students and faculty receive the maximum benefit from the technology made available under the Smart Schools Bond Act, the Mohonasen Central School District has already established a robust connectivity infrastructure that meets the Federal Communications Commission's standard of 100 Mbps per 1,000 students.

The district contracts its internet connectivity services through the Northeast Regional Information Center (NERIC). Through this partnership, the district utilizes a burstable internet circuit, which allows for increased bandwidth during periods of high demand, such as computer-based testing (CBT) or other instructional peaks.

At present, the district is contracted at 350 Mbps, which exceeds the FCC's minimum requirement given current student and staff numbers. This burstable capacity is:

1. Explicitly outlined in the district's service agreement with NERIC, ensuring formal recognition and compliance with service-level expectations.
2. Guaranteed to be available as needed to all students and devices, including during periods of high bandwidth demand, thus ensuring uninterrupted access to digital instructional resources and assessment tools.

As such, the district already meets the minimum connectivity standard required under the Smart Schools Bond Act and does not require additional infrastructure funding to fulfill this requirement within the 12-month timeframe.

- 1B. **If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.**

☐ By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required). If the district currently meets the required speed, enter "Currently Met" in the last box: Expected Date When Required Speed Will be Met.

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

Classroom Learning Technology

Page Last Modified: 07/28/2025

	Number of Students	Required Speed in Mbps	Current Speed in Mbps	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	2,772	277.20	350	(No Response)	(No Response)

3. **If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.**

Please describe how you have quantified this demand and how you plan to meet this demand.

To ensure reliable Internet access for students and staff using wireless devices within school buildings and in surrounding outdoor areas, the Mohonasen Central School District has made significant investments in a comprehensive wireless infrastructure and continues to enhance its ability to meet growing demand.

Quantifying Wireless Demand

The district has assessed current and projected wireless bandwidth needs through:

Device Usage Analysis: Evaluating the number and types of devices accessing the network—including student Chromebooks, staff laptops, tablets, and classroom technology.

Peak Load Modeling: Planning for high-density usage during peak times, such as online assessments and full-building instructional periods, where hundreds of devices may be simultaneously active.

Application-Specific Requirements: Factoring in the bandwidth demands of core instructional tools and digital content platforms, including streaming video, web conferencing, and cloud-based testing applications.

Meeting Demand Through Strategic Wireless Deployment

To meet and exceed these needs, the district has deployed:

330 Strategically Placed Wireless Access Points: Access points are distributed throughout all district facilities to ensure robust coverage, with at least one located in every learning space (e.g., classrooms, labs, libraries) and many installed in outdoor areas to support flexible learning environments.

Monitoring and Optimization Tools: The district actively monitors wireless availability and performance using multiple tools to assess real-time capacity and user connectivity, allowing staff to respond quickly to service issues.

Future Enhancements with Passelear PRTG: In the near future, the district plans to transition its current monitoring systems to Passelear PRTG, a more advanced network monitoring platform. This will provide greater visibility into network usage patterns and allow for proactive identification and resolution of service disruptions, enhancing both instructional continuity and user experience.

Through this combination of wide-reaching access point coverage, ongoing performance monitoring, and forward-looking infrastructure improvements, Mohonasen Central School District ensures that its wireless network can support the digital learning needs of all students and staff, both now and in the future.

4. All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

Classroom Learning Technology

Page Last Modified: 07/28/2025

☒ By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

- 5. Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

This submission is a supplemental request under the Smart Schools Investment Plan. The district intends to use these funds to replace aging Chromebooks in our current fleet that are reaching end-of-support (EOS) status and are no longer viable for student use. These devices will be removed from circulation and replaced with new Chromebooks that are fully compatible with the district's existing instructional technology platforms, including our Google Workspace for Education environment, learning management systems, and digital curriculum tools.

Device Compatibility and Infrastructure Readiness

The replacement Chromebooks are:

Fully compatible with existing network configurations, including Wi-Fi access points and content filtering systems.

Aligned with device management protocols already in place through the district's Google Admin Console and mobile device management (MDM) systems.

Supported by our current software ecosystem, ensuring seamless integration without requiring additional training or infrastructure adjustments.

Facility Infrastructure Adequacy

Since these devices are replacements rather than additions, they will not place additional strain on facility infrastructure. The following elements have already been accounted for and are sufficient:

Electrical Systems: Existing power infrastructure, including classroom charging stations and carts, remains adequate to support the replacement devices.

HVAC: The devices do not introduce any additional heating or cooling load beyond what is already managed under current operations.

Wi-Fi Network: The district's robust wireless network, supported by 330 access points, is fully capable of supporting these replacement devices without additional upgrades.

As such, this investment represents a continuation of the district's ongoing commitment to maintaining an up-to-date, reliable, and instructionally aligned student device fleet, without requiring any new physical infrastructure enhancements.

- 6. Describe how the proposed technology purchases will:**
- > enhance differentiated instruction;**
 - > expand student learning inside and outside the classroom;**
 - > benefit students with disabilities and English language learners; and**
 - > contribute to the reduction of other learning gaps that have been identified within the district.**

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

Classroom Learning Technology

Page Last Modified: 07/28/2025

curriculum?”)

In addition, describe how the district ensures equitable access to instruction, materials and assessments and participation in the general curriculum for both SWD and English Language Learners/Multilingual Learners (ELL/MLL) students.

Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an expedited basis, the district should explain how this plan will facilitate remote and hybrid learning, in lieu of responding to the question above.

This supplemental submission is intended to replace existing Chromebooks that have reached End of Support (EOS), ensuring that students continue to have access to reliable, supported devices. The replacement devices align with the district's existing platforms and instructional technology plan, and do not alter the original implementation strategy.

Maintaining a current fleet of Chromebooks supports differentiated instruction, extends learning beyond the classroom, and ensures continued access to assistive technology and language support tools for students with disabilities and English Language Learners. This replacement also helps the district close learning gaps by ensuring that all students can participate fully in the general curriculum using up-to-date instructional technology.

7. **Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

This submission is a supplemental request focused solely on the replacement of end-of-support (EOS) Chromebooks within the district's existing device fleet. There is no change to the original Smart Schools Investment Plan, and the proposed purchases serve to maintain current functionality rather than introduce new initiatives.

By replacing aging devices, the district ensures continued access to communication tools and learning platforms that support ongoing engagement with parents and stakeholders, such as Google Classroom, parent portals, and email. These platforms are essential for sharing student progress, assignments, and school updates.

Additionally, the continued functionality of these devices supports the district's ability to participate in regional technology partnerships, including distance learning, virtual meetings, and collaborative professional development, by ensuring that both students and staff have reliable, up-to-date technology.

8. **Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.**

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

Please note: If this plan has been identified as a Remote Learning Plan to be submitted and reviewed on an expedited basis, the district should provide a statement confirming that the district has provided or will provide professional development on these devices to its staff, in lieu of responding to the question above.

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1

Classroom Learning Technology

Page Last Modified: 07/28/2025

This submission is a supplemental request intended solely to replace Chromebooks that have reached End of Support (EOS) in the district's existing fleet. There is no change to the original Smart Schools Investment Plan, including the professional development components previously outlined.

Because this purchase maintains existing device functionality rather than introducing new technology, no additional professional development is required. Staff are already trained and experienced in using these devices to support instruction, and the district's ongoing professional development programs continue to reinforce best practices in technology integration.

9. Districts must contact one of the SUNY/CUNY teacher preparation programs listed on the document on the left side of the page that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

☒ By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

- 9B. Please enter the name of the SUNY or CUNY Institution that you contacted.

SUNY Albany

- 9C. Enter the primary Institution phone number.

- 9D. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

10. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

11. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

☒ By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

12. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be Purchased	Quantity	Cost per Item	Total Cost
Laptop Computers	Chromebooks	1,225	302.00	369,950.00

Pre-Kindergarten Classrooms

Page Last Modified: 06/06/2025

1. **Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.**

(No Response)

2. Describe the district's plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that new pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. **Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.**

(No Response)

4. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.**

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Smart Schools Investment Plan - Revised - 1mohon-Supplemental1
High-Tech Security Features

Page Last Modified: 06/06/2025

1. **Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.**

(No Response)

2. **All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Smart Schools plans with any expenditures in the High-Tech Security category require a project number from the Office of Facilities Planning. Districts must submit an SSBA LOI and receive project numbers prior to submitting the SSIP. As indicated on the LOI, some projects may be eligible for a streamlined review and will not require a building permit. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.**

Project Number
(No Response)

3. **Was your project deemed eligible for streamlined Review?**

☐ Yes

☐ No

4. **Include the name and license number of the architect or engineer of record.**

Name	License Number
(No Response)	(No Response)

5. **Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category.**

Select the allowable expenditure type. Repeat to add another item under each type.	Item to be purchased	Quantity	Cost per Item	Total Cost
(No Response)	(No Response)	(No Response)	(No Response)	0.00
