

An Introduction to the New York State P-12 Science Learning Standards

New York State
EDUCATION DEPARTMENT
[Knowledge](#) > [Skill](#) > [Opportunity](#)

Today's Objectives

1. Read the Introduction to the New York State P-12 Science Learning Standards (NYSP12SLS).
2. Learn about the three dimensions of the NYSP12SLS.
3. Understand the organization/structure of the NYSP12SLS.
4. Know instruction and assessment timeline aligned to the NYSP12SLS.
5. Determine the instructional shifts required for the NYSP12SLS implementation in your classroom.

Introduction to the Standards

Read pages 1-3 of the Introduction, then consider...

Why were the new science learning standards developed?

How can you best support the needs of English Language Learners/Multilingual Learners in your classroom?

To whom do the science learning standards apply?

How can you best support the needs of students with disabilities in your classroom?

The Three Dimensions

Create a graphic representation of the three dimensions.

When your group is finished, post your representation, then complete a gallery walk to view other educators' designs.

The Organization of the NYSP12SLS

Read page 6-7 of the Introduction, then consider...

Location of performance expectations.

The significance of an asterisk (*) in the standards document.

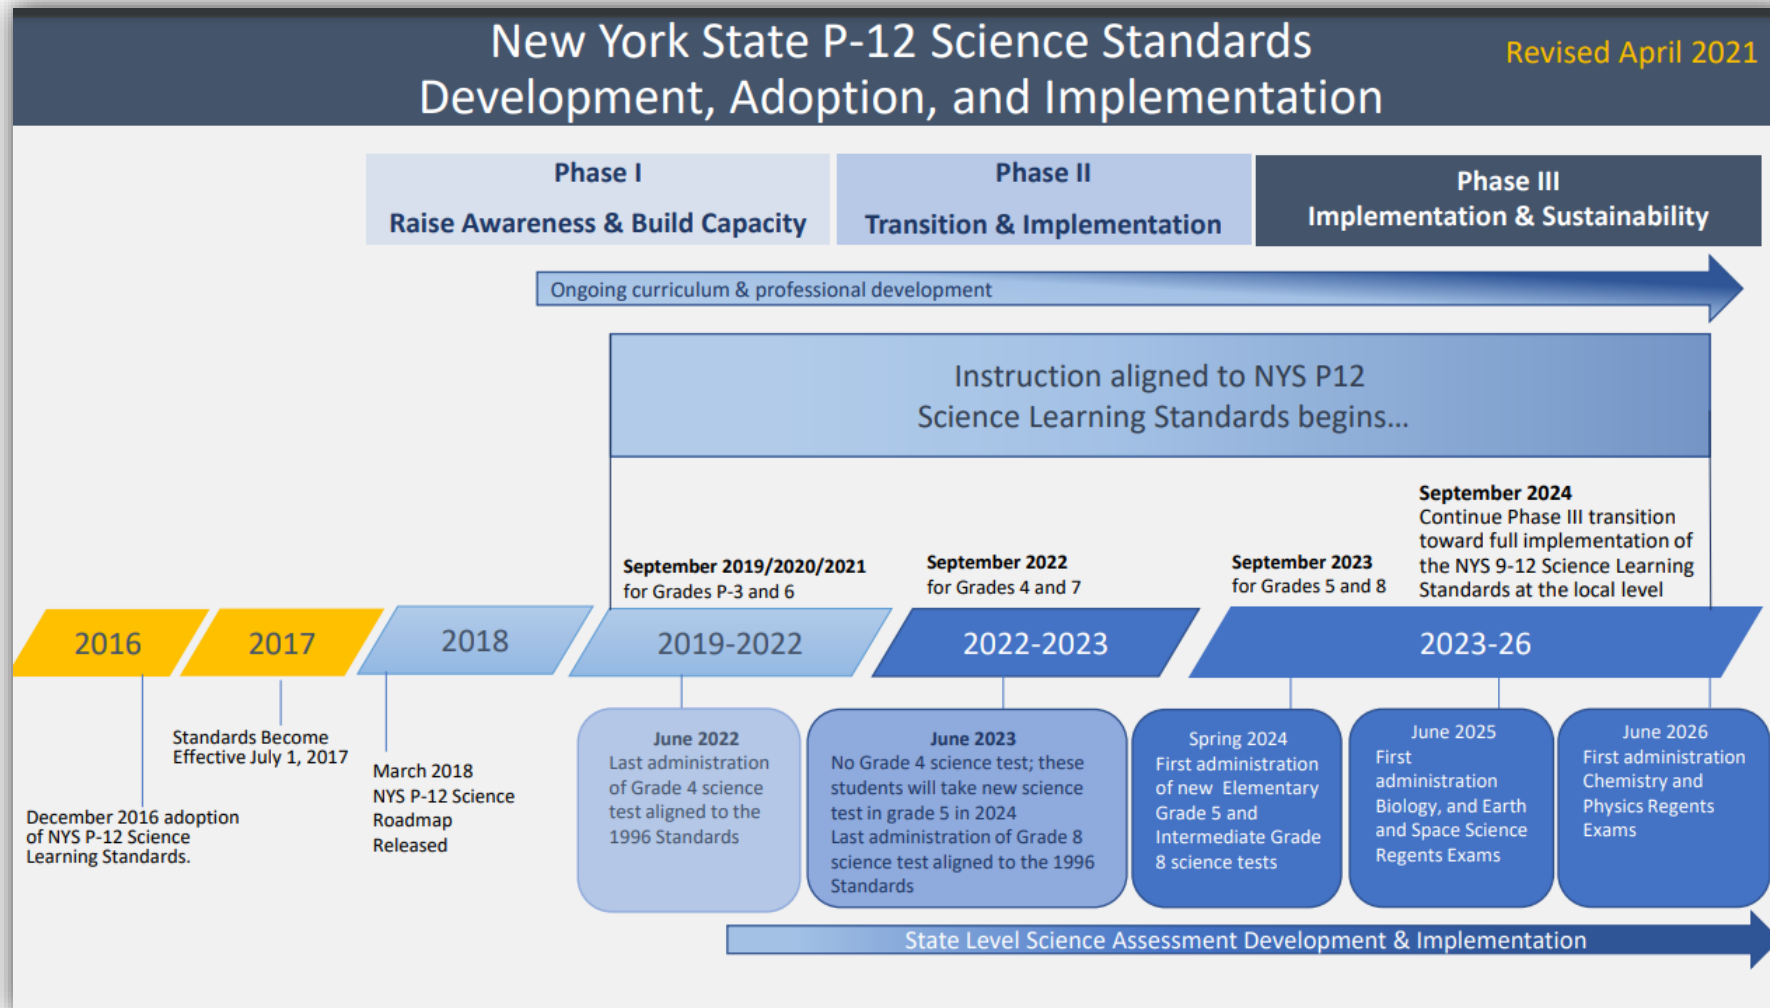

The difference between a clarification statement and an assessment boundary.

The significance of the notation (NYSED) in the standards document.

New York State P-12 Science Learning Standards

3. Weather and Climate		
<p>Students who demonstrate understanding can:</p> <p>3-ESS2-1. Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season. [Clarification Statement: Examples of data could include average temperature, precipitation, and wind direction.] [Assessment Boundary: Assessment of graphical displays is limited to pictographs and bar graphs. Assessment does not include climate change.]</p> <p>3-ESS2-2. Obtain and combine information to describe climates in different regions of the world. [Clarification Statement: Emphasis should be on various climates in different regions rather than on localized weather conditions.]</p> <p>3-ESS3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.* [Clarification Statement: Examples of design solutions to weather-related hazards could include barriers to prevent flooding, wind resistant roofs, and lightning rods.]</p> <p>3-ESS2-3. Plan and conduct an investigation to determine the connections between weather and water processes in Earth systems. [Clarification Statement: Emphasis should be on the processes that connect the water cycle and weather patterns.]</p> <p>The performance expectations above were developed using the following elements from the NRC document <i>A Framework for K-12 Science Education</i>:</p>		
<p>Science and Engineering Practices</p> <p>Planning and Carrying Out Investigations Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.</p> <ul style="list-style-type: none"> Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (3-ESS2-3) Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution. (3-ESS2-3) <p>Analyzing and Interpreting Data Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.</p> <ul style="list-style-type: none"> Represent data in tables and various graphical displays (bar graphs and pictographs) to reveal patterns that indicate relationships. (3-ESS2-1) <p>Engaging in Argument from Evidence Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).</p> <ul style="list-style-type: none"> Make a claim about the merit of a solution to a problem by citing relevant evidence about how it meets the criteria and constraints of the problem. (3-ESS3-1) <p>Obtaining, Evaluating, and Communicating Information Obtaining, evaluating, and communicating information in 3–5 builds on K–2 experiences and progresses to evaluating the merit and accuracy of ideas and methods.</p> <ul style="list-style-type: none"> Obtain and combine information from books and other reliable media to explain phenomena. (3-ESS2-2) <p><i>Connections to other DCIs in third grade: N/A</i></p> <p><i>Articulation of DCIs across grade-levels: K.ESS2.D (3-ESS2-1); K.ESS3.B (3-ESS3-1); K.ETS1.A (3-ESS3-1); 4.ESS2.A (3-ESS2-1); 4.ESS3.B (3-ESS3-1); 4.ETS1.A (3-ESS3-1); 5.ESS2.A (3-ESS2-1); MS.ESS2.C (3-ESS2-1),(3-ESS2-2); MS.ESS2.D (3-ESS2-1),(3-ESS2-2); MS.ESS3.B (3-ESS3-1)</i></p> <p><i>New York State Next Generation Learning Standards Connections:</i></p> <p>ELA/Literacy—</p> <p>3RI Develop and answer questions to locate relevant and specific details in a text to support an answer or inference. (3-ESS2-2)</p> <p>3WI Write opinion pieces on topics or texts, supporting a point of view with reasons. (3-ESS3-1)</p> <p>3W6 Conduct research to answer questions, including self-generated questions, and to build knowledge about a topic. (3-ESS2-3),(3-ESS3-1)</p> <p>3W7 Recall relevant information from experiences or gather information from multiple sources; take brief notes on sources and sort evidence into provided categories. (3-ESS2-2)</p> <p>Mathematics—</p> <p>MP.2 Reason abstractly and quantitatively. (3-ESS2-1),(3-ESS2-2),(3-ESS3-1)</p> <p>MP.4 Model with mathematics. (3-ESS2-1),(3-ESS2-2),(3-ESS3-1)</p> <p>MP.5 Use appropriate tools strategically. (3-ESS2-1),(3-ESS2-3)</p> <p>NY-3.MD.2 Measure and estimate liquid volumes and masses of objects using grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or liquid volumes that are given in the same units. (3-ESS2-1),(3-ESS2-3)</p> <p>NY-3.MD.3 Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled picture graph or scaled bar graphs. (3-ESS2-1)</p> <p><small>*Connection boxes updated as of September 2018</small></p>	<p>Disciplinary Core Ideas</p> <p>ESS2.D: Weather and Climate</p> <ul style="list-style-type: none"> Scientists record patterns of the weather across different times and areas so that they can make predictions about what kind of weather might happen next. (3-ESS2-1) Climate describes a range of an area's typical weather conditions and the extent to which those conditions vary over years. (3-ESS2-2) (NYSED) Earth's processes continuously cycle water, contributing to weather and climate. (3-ESS2-3) <p>ESS3.B: Natural Hazards</p> <ul style="list-style-type: none"> A variety of natural hazards result from natural processes. Humans cannot eliminate natural hazards but can take steps to reduce their impacts. (3-ESS3-1) (Note: This Disciplinary Core Idea is also addressed by 4-ESS3-2) 	<p>Crosscutting Concepts</p> <p>Patterns</p> <ul style="list-style-type: none"> Patterns of change can be used to make predictions. (3-ESS2-1),(3-ESS2-2) <p>Cause and Effect</p> <ul style="list-style-type: none"> Cause and effect relationships are routinely identified, tested, and used to explain change. (3-ESS2-3),(3-ESS3-1) <hr/> <p>Connections to Engineering, Technology, and Applications of Science</p> <p>Influence of Engineering, Technology, and Science on Society and the Natural World</p> <ul style="list-style-type: none"> (NYSED) Engineers improve existing technologies or develop new ones to increase their benefits (e.g., improved Doppler radar), decrease known risks (e.g., severe weather alerts), and meet societal demands (e.g., cell phone applications). (3-ESS3-1) <hr/> <p>Connections to Nature of Science</p> <p>Science is a Human Endeavor</p> <ul style="list-style-type: none"> Science affects everyday life. (3-ESS3-1)

Implementation Timeline and Quick Guide

Reflect on the following:

When will I begin implementation of the NYSP12SLS?

When will state assessments be aligned to the NYSP12SLS?

New York State P-12 Science Learning Standards Quick Guide

What are the New York State P-12 Science Learning Standards (NYSP-12SLS)?

Adapted from the Next Generation Science Standards in 2016, the NYSP-12SLS are a series of performance expectations that define what students should understand and be able to do because of their study of science. The NYSP-12SLS are based on the Framework for K-12 Science Education developed by the National Research Council and the Next Generation Science Standards as well as guiding documents grounded in the most current research in science and scientific learning. These standards reflect the importance of every student's engagement with natural scientific phenomenon at the nexus of three dimensions of learning; Science and Engineering Practices, Disciplinary Core Ideas, and Crosscutting concepts.

What are the three dimensions of the New York State P-12 Science Learning Standards?

Below is a quick introduction to the Science and Engineering Practices, Disciplinary Core Ideas, and Crosscutting Concepts.

For more information, please visit the [Introduction to the New York State P-12 Science Learning Standards](http://www.nysed.gov/common/nysed/files/programs/curriculum-instruction/nyscienceintro.pdf)

(<http://www.nysed.gov/common/nysed/files/programs/curriculum-instruction/nyscienceintro.pdf>).

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<p>⇒ Science and Engineering Practices describes (a) the major practices that scientists employ as they investigate and build models and theories about the world and (b) a key set of engineering practices that engineers use as they design and build systems.</p> <p>⇒ Listed below are the eight science and engineering practices from the Framework:</p> <ol style="list-style-type: none"> 1. Asking questions and defining problems 2. Developing and using models 3. Planning and carrying out investigations 4. Analyzing and interpreting data 5. Using mathematics and computational thinking 6. Constructing explanations and designing solutions 7. Engaging in argument from evidence 8. Obtaining, evaluating, and communicating information 	<p>⇒ Disciplinary Core Ideas are built on the notion of learning as a developmental progression. They are designed to help children continually build on and revise their knowledge and abilities, starting from their curiosity about what they see around them and their initial conceptions about how the world works.</p> <p>⇒ The goal is to guide their knowledge toward a more scientifically based and coherent view of the natural sciences and engineering, as well as of the ways in which they are pursued and their results can be used.</p>  NYS P-12 Science LEARNING STANDARDS	<p>⇒ Crosscutting Concepts are meant to give students an organizational structure to understand the world and help students make sense of and connect Core Ideas across disciplines and grade bands.</p> <p>⇒ Listed below are the seven crosscutting concepts from the Framework:</p> <ol style="list-style-type: none"> 1. Patterns 2. Cause and Effect 3. Scale, Proportion, and Quantity 4. Systems and System Models 5. Energy and Matter in Systems 6. Structure and Function 7. Stability and Change of Systems

Q&A for Science Educators

Q: When will the New York State P-12 Science Learning Standards (NYSP-12SLS) and their corresponding state assessments be implemented? The implementation timeline can be found at found on the [Science Curriculum and Instruction](http://www.nysed.gov/common/nysed/files/programs/curriculum-instruction/science-timeline.pdf) website. Visit: <http://www.nysed.gov/common/nysed/files/programs/curriculum-instruction/science-timeline.pdf>

Q: Are there High School Course maps in Science? Yes, there are NYSP-12SLS aligned High School course maps for [Biology](#), [Earth and Space Sciences](#), [Chemistry](#), and [Physics](#). Visit: <http://www.nysed.gov/curriculum-instruction/science-standards-implementation-resources> to access the High School Course maps in Science.

Q: Where can I learn more about NYSP-12SLS? You can learn more about the [NYS P-12 Science Learning Standards](#) by visiting our NYSED web site. Visit: <http://www.nysed.gov/curriculum-instruction/science-learning-standards>

Implementation Timeline and Quick Guide

Reflect on the following:

When will I begin implementation of the NYSP12SLS?

When will state assessments be aligned to the NYSP12SLS?

Connecting to the Performance Expectations

Identify a performance expectation that would call for an instructional change in your classroom instruction and explain how you would modify your instruction.

Closure

Reflect on the following:

What did I learn about the NYSP12SLS?

What questions remain about the NYSP12SLS?
