## **SCORING CLARIFICATION**

2022 Mathematics Tests, Grade 6  
Chinese (Simplified) Edition Only  
Session 2, Question 38

This notice pertains to Question 38 on the Chinese (Simplified) edition of the 2022 Grade 6 Mathematics Test, Session 2.

Due to an inaccuracy in the translation of Question 38, all students who used the Chinese (Simplified) edition of this test, either exclusively or in conjunction with the English edition, should be given credit for this question. At the time of the processing of the students' scores, the Department's contractor will adjust the score recorded as necessary so that all students who used a Chinese (Simplified) edition of this test will be given credit for this question. This will apply to both the paper-based and computer-based Chinese (Simplified) editions of this test.

Please make sure to darken the circle for "Chinese (Simplified)" in the box labeled "Alternate Language" on the answer sheet for all students who used a paper-based Chinese (Simplified) edition of this test, either exclusively or in conjunction with an English edition. For students who used a computer-based Chinese (Simplified) edition of this test, the computer record will automatically include this information.

We apologize for any inconvenience this may cause you and we thank you for your hard work on behalf of the students in New York State.
