					<b>Total</b> ___/15

\* The benchmark for determining comprehensibility for Intermediate learners at Checkpoint B is whether the language produced is comprehensible to “a person accustomed to engaging with non-native speakers of the language.”

### **Tips for Administering Presentational Tasks**

1. Each task is worth fifteen points and is graded separately using this scoring rubric.
2. For additional clarification on the meanings of the scoring rubric dimensions, refer to the Master Rubrics for Presentational Communication - Modern Languages.
3. The rater should ignore English words or expressions for the purposes of determining comprehensibility and discourse type with the exception of proper nouns.
4. If the student does not address the communicative purpose highlighted in the task description, then the sample is not rated and receives a score of zero.
5. Do not round half point scores until all tasks are completed and the scores for the tasks are added together. Once the total score of all tasks is calculated, then a half point (.5) can be rounded up to the next whole number.
