1. GENERAL INFORMATION

This bulletin provides information about the Scholarships for Academic Excellence (SAE) to be awarded in 2026 for the 2025-2026 academic year. *Pending the appropriation of State funds during the 2026 session of the New York State Legislature*, 8,000 scholarships will be awarded. Of the 8,000 awards, 2,000 scholarships will have a value of \$1,500 each and 6,000 scholarships will have a value of \$500 each. Winners of this scholarship may concurrently receive any other New York State academic or general award for which they may be eligible. However, winners cannot be awarded a Scholarship for Academic Excellence in any amount when the combination of all awards would exceed their cost of attendance in college. ***Scholarship winners must attend a college or university in New York State. SAEs cannot be used for trade schools. Those who do not attend a college or university in New York State forfeit the award.*** In no event shall the amount of the annual award exceed the recipient's cost of attendance at the institution attended. Cost of attendance includes tuition, required fees, laboratory and other institution-related expenses, books, transportation, and room and board.

Awards are renewable for up to four academic years of undergraduate study or five academic years, if the program of study normally requires five years as defined by the Commissioner of Education. In the event that a scholarship is declined by the student or revoked by the Commissioner of Education, its benefits will lapse and no re-awards will be made.

The ratio will be multiplied by the number of scholarships available, and the result, rounded to the nearest whole number, will be the number of scholarships allocated to the school.

Six thousand scholarships valued at \$500 each will be allocated in the same manner as described above.

- C. If the number of scholarships allocated to a high school is larger than the number of students who meet the requirements for selection as scholarship nominees, the excess number of scholarships will lapse.

5. SELECTION CRITERIA FOR SCHOLARSHIPS FOR ACADEMIC EXCELLENCE

The selection criteria for nominees for the Scholarships for Academic Excellence must be published and made available to students by the high school at the beginning of each school year. For the 2026 competition, the selection criteria must be published and made available to students on or before September 30, 2025.

****Note: The high school should use selection criteria “Method A: Regents test scores” whenever possible; if “Method A: Regents test scores” is not possible, the school should then select between Methods B or C.**

A high school shall use uniform criteria for the selection of scholarship nominees, applicable to all competing students, such criteria to be in accordance with the requirements of this section. **Please note, if an award is declined by a student prior to the end of their high school program, the scholarship may be awarded, to the extent practicable, to the next highest ranking student.**

Method A: Regents test scores

A high school which, prior to its students' senior year, has offered to all such students seeking Regents credit at the school either a Regents examination or a single approved alternative assessment (see <http://www.p12.nysed.gov/>), but not both, in each of the following subjects: comprehensive English, global studies, United States history/government, algebra I, algebra II, and in two or more of the following four sciences: earth science, living environment/biology, chemistry, and physics, shall select scholarship nominees on the basis of the following criteria:

The high school shall select their winner(s) by computing a weighted average of the scores on the Regents examinations and/or approved alternative assessments taken by its students prior to their senior year, in all of the following subjects:

The weighting of the scores shall be:

English Language Arts	weight of three
Algebra II	weight of three
Global studies and Geography	weight of one
United State History & Government	weight of one
Science:	
At least two, but up to four	
courses may be included	weight of one <u>for each course.</u>

Individual schools must decide, in the science area, how many science courses to use in the calculation. They must use the same number of science courses for all students in the competition though they do not need to use the same courses.

If the approved alternative assessment is **not** scored on a one-hundred-point scale, the high school must convert the scores on the approved alternative assessment to a one hundred-point scale. **If a student elected not to take the Regents examinations listed, or an approved alternative assessment, then that student cannot compete or be selected as a scholarship winner.**

****Note:** The high school should use selection criteria described above for "Method A: Regents test scores" whenever possible; if "Method A: Regents test scores" is not possible, the school should then select between Methods B or C, described below.

Method B: Rank in class

For high schools that can determine class rank because of their grading system, class rank of students at the end of their junior year.

In the case of a tie, the high school may determine rank order by lottery among individuals having the same class rank.

OR

Method C: Locally developed examination of English and mathematics

For high schools that cannot determine class rank because of their grading system, a locally developed and administered assessment of academic performance which shall test the subjects of English and mathematics and shall be conducted prior to the end of the junior year.

In the case of a tie in the weighted average score that is used for the selection of a junior year to determine the priority ranking of tied scholarship nominees: if the high school cannot determine class rank because of the grading system of the high school or in case of a tie in class rank, the high school shall determine priority order by lottery among tied individuals.

In the case of a tie in class rank or in the score on the locally developed and administered assessment of academic performance that is used for selection of a scholarship nominee, the high school shall determine priority order by lottery among individuals having the same class rank.

6. DIRECTIONS FOR COMPLETING THE SURVEY FORM
